## Glove: Global Vectors for Word Representation

Jeffrey Pennington, Richard Socher, Christopher D. Manning · EMNLP · 2014

Recent methods for learning vector space representations of words have succeeded in capturing fine-grained semantic and syntactic regularities using vector arithmetic, but the origin of these... [\(More\)](#)

## Similarity with Word Embeddings

Kenter, De Arie Rijke · 2015

Determining semantic similarity between texts is important in many tasks in information retrieval such as search, query suggestion, automatic summarization and image finding. Many approaches have... [\(More\)](#)

## Word Spotting and Recognition with Embedded Attributes

Jon Almazán, Albert Gordo, Alicia Fornés, Ernest Valveny · IEEE Transactions on Pattern Analysis and Machine... · 2014

This paper addresses the problems of **word** spotting and **word** recognition on images. In **word** spotting, the goal is to find all instances of a query **word** in a dataset of images. In recognition, the goal... [\(More\)](#)

## Man is to Computer Programmer as Woman is to Homemaker? Debiasing Word Embeddings

Tolga Bolukbasi, Kai-Wei Chang, James Y. Zou, Venkatesh Saligrama, Adam Tauman Kalai · NIPS · 2016

The blind application of machine learning runs the risk of amplifying **biases** present in data. Such a danger is facing us with **word embedding**, a popular framework to represent text data as vectors... [\(More\)](#)

## Portuguese **Word Embeddings**: Evaluating on **Word Analogies** and Natural Language Tasks

[Nathan Hartmann](#), [Erick R. Fonseca](#), [Christopher Shulby](#), [Marcos Vinícius Treviso](#), [Jessica Rodrigues](#), [Sandra M. Aluísio](#) • STIL • 2017

**Word embeddings** have been found to provide meaningful representations for words in an efficient way; therefore, they have become common in Natural Language Processing systems. In this paper, we... [\(More\)](#)

## SensEmbed: Learning Sense **Embeddings** for **Word** and Relational Similarity

[Ignacio Iacobacci](#), [Mohammad Taher Pilehvar](#), [Roberto Navigli](#) • ACL • 2015

**Word embeddings** have recently gained considerable popularity for modeling words in different Natural Language Processing (NLP) tasks including semantic similarity measurement. However,... [\(More\)](#)

## Making Sense of **Word Embeddings**

[Maria Pelevina](#), [Nikolay Arefyev](#), [Christian Biemann](#), [Alexander Panchenko](#) • Rep4NLP@ACL • 2016

We present a simple yet effective approach for learning **word** sense **embeddings**. In contrast to existing techniques, which either directly learn sense representations from corpora or rely on sense... [\(More\)](#)

## Relevance-based **Word Embedding**

[Hamed Zamani](#), [W. Bruce Croft](#) • SIGIR • 2017

Learning a high-dimensional dense representation for vocabulary terms, also known as a **word embedding**, has recently attracted much attention in natural language processing and information retrieval... [\(More\)](#)
